

L&T VALVES AFTERMARKET SOLUTIONS

L&T Valves is a wholly owned subsidiary of Larsen & Toubro, the global technology and engineering conglomerate.

We offer Aftermarket solutions that enhance the safety, reliability and performance of the valves installed in your facilities throughout their service life. We leverage valve manufacturing expertise of over

six decades as well as field experience gained across geographies, industries and processes to maximise customer value.

Higher productivity, lower total cost of ownership and peace of mind – that’s the L&T Valves Aftermarket promise.

Our Aftermarket Spectrum

Prompt Service

We offer a range of on-site and off-site services delivered by our experienced service engineers and associates across the globe.

Genuine Spares

Genuine spare parts are vital for trouble-free performance, and our global manufacturing and distribution footprint ensures fast availability.

Technical Support

Our experienced valve specialists are equipped to offer solutions that enhance performance and reduce the total cost of ownership.

Knowledge Sharing

Our training programmes equip valve buyers and users to address all flow-control issues with clarity and confidence.

Knowledge-sharing Webinars

We thank you for making L&T Valves Webinars a global success. We invite you to join the new series that offers new topics and convenient schedules.
