

# ENERGY POLICY

We at L&T Valves Limited, engaged in the design and manufacturing of industrial valves, are committed to

- Comply with all applicable legal, statutory, regulatory and other requirements related to energy use, energy efficiency and energy consumption.
- Establish, review and achieve energy objectives and targets supported by Energy Performance Indicators (EnPIs) and Energy Baselines (EnBs).
- Integrate energy performance considerations into the design and procurement of facilities, equipment, systems, products and services to support long-term energy efficiency.
- Provide necessary resources, develop competence and enhance awareness among employees and stakeholders to effectively implement the Energy Management System and achieve our energy objectives and targets.
- Continually improve our energy performance, including energy use, energy efficiency and energy consumption, with specific focus on our Significant Energy Uses (SEUs).
- Review periodically and communicate this Energy Policy to all employees and stakeholders and make it available to interested parties upon request.
